The posthumous disc by **Paco de Lucía** is "**Canción Andaluza**", the copla album that the famous guitarist finalized. Canción Andaluza is a trip through copla, like an artistic testament. It was the kind of music that he wanted to do in that moment of his life and in it he displays more his side as an arranger than the composer one. A work in which artists like Óscar de León, Estrella Morente or Parrita files and that goes over great copla milestones like María de la O, Ojos Verdes or Señorita.
